

# DESIGN THE FUTURE

We're living through a difficult and unprecedented period that is impacting not just on our societies and on our lives but also on our ways to teach and to learn in the Piacenza Campus of Politecnico di Milano. The series on online seminars with guests is an occasion to recover the true dimensions of our School and to remember that – despite current condition – we're part of a large and International community sharing ideas, values and hopes. DESIGN THE FUTURE wants to look beyond the emergency by telling histories of projects and architectures for the world which will come.

“City, a source of imagination”

**APS Landscape**

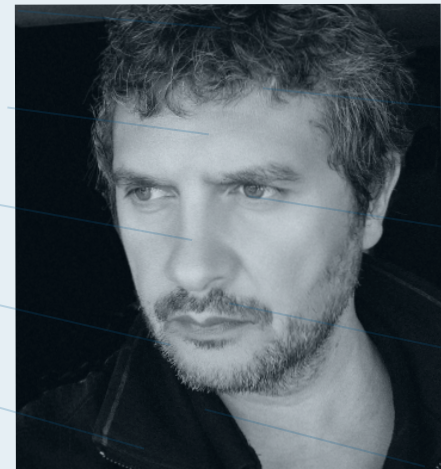

by Valerio Morabito

Valerio Morabito is Adjunct Professor at the Department of Landscape Architecture, school of Design, University of Pennsylvania, USA, and Professor at the Mediterranean University, Italy.

His academic and practical interests are focused on city's space and its evolution, synthesized in his recent book *The City of Imagination*. In the last 15 years, he has taught landscape architecture studios around 4 continents, winning a Barcelona Biennial of Landscape and several ASLA awards in United States.

In 2014, he founded the Mediterranean University spin off APS Landscape, an office that investigates cities' evolutions with the lens of landscape, exploring new and innovative architectural and landscape design solutions related to ecology and sustainability. With APS Landscape, he has developed many projects in different countries, moving from the city scale exploring landscape strategies, urban infrastructure, public parks, public spaces, and buildings. APS Landscape has received numerous prizes and international awards for its design quality.
