

# resilient strategies in risk situations

a.a. 2019/2020

## lectures:

monday 15/06 : 9.15 – 10.30 a.m.  
**Simona Morini**  
philosopher - associate professor i.u.a.v. venezia  
"The Risk City"

monday 15/06 : 10.30 – 11.45 a.m.  
**Carlos Rivera**  
architect - professor e.t.s.a. sevilla - spain  
"From Ecology to Risk Society"

tuesday 16/06 : 9.15 – 10.30 a.m.  
**Anna Fasano**  
economist - president of banca etica  
"Global Economy & Local Culture"

tuesday 16/06 : 10.30 – 11.45 a.m.  
**Pablo Longoria**  
architect - world monuments fund - spain  
"Urban Renovation in Heritage Contexts"

on microsoft teams  
<https://bit.ly/RSRS2020>

The **risk**, derived by the virus of covid19, is an **ecological problem** with **social consequences** that needs **resilient strategies**.

The pandemic is changing our productive model, starting from the mobility; closing us, on the Global scale, into our housings and private dimension, it modifies the use of the City and the Public Space; the Covid is also changing the social and human relationships, reducing our real life into a virtual one. From the Square to the Screen.

The Architecture should think about what kind of Resilience Strategies offer an answer to this unusual Risk Situation. What about City and Society post emergency? Could the **local scale** be a lab to solve **global problems**? How can the Heritage Community take part in the renovation of our **cities** and the cohesion of our society? How can the Architecture and Urbanism of proximity -as in the traditional Mediterranean Patio [City] - (re)built the relation between people and the **ecological, social and economic sustainability** of our community space?
