

PO RIVER REGAINED

THE NEW PIACENZA LANDSCAPE

31 AUGUST 2020 | 11 SEPTEMBER 2020

SECOND LECTURE | 03 SEPTEMBER 2020

**h 18.00
Gareth
Doherty**

(Member of the
Harvard Graduate
School of Design)

Through a focus on human practice, Doherty explores diverse forms of knowledge that constitute the field of landscape architecture. Each of his publications, including *Paradoxes of Green*, *Roberto Burle Marx Lectures*, *Is Landscape...?*, *Ecological Urbanism*, and *New Geographies*, which he co-founded, expands the limits and scope of landscape architectural theory and design. Asking how people-centered fieldwork can inform disciplinary innovations, Doherty's work broadens disciplinary discussions on participatory methods in landscape architecture.
