

THE METROPOLITAN AREA OF MILANO

FROM THE LANDSCAPE'S MAIN STRUCTURES TO THE GREEN INFRASTRUCTURE STRATEGY DEALING WITH CLIMATE CHANGE AND OTHER CHALLENGES

Maddalena Gioia Gibelli graduated in 1978 at Politecnico di Milano, and since then she's always been dealing with landscape. She works in Milan in landscape design and planning field, focusing on landscape ecology as a common asset. She's the author of many plans and projects, at different scales, such as the winner project of Pays Med III Edition, about Parco delle Risaie's agri-environmental enhancement (2009-2015) and the First Prize in the International Design Competition for "Regeneration of an urban corridor; Planning and Designing the ground level of Theran-Tabriz Railway Tunnel" (2019). She's been teaching Ecological Planning at Politecnico di Milano since 1998 and Environmental Ecology at Genova's University for more than ten years. Gibelli is also president of "Casa dell'agricoltura", author of almost 120 publications.
