Open Day

Energising Landscapes: Axes of Transformation

8th July 2021
14.00 - 16.00

Webex: <https://cutt.ly/ymq9Npa>

Miro Exhibition: <https://cutt.ly/0met6Gb>

Join us for an online exhibition of the work developed by the Master's students in Sustainable Architecture and Landscape Design during the Urban and Environmental Design Studio – C (2021), *Energising Landscapes: Axes of Transformation*. The studio aimed at reimagining the roles of nature in addressing global challenges and their local manifestations, providing the grounds for a systemic integration of anthropic and natural systems. Students developed cross-scale visionary ideas for a series of green wedges and a greenway for Milan.

Organisers

Prof. Fabiano Lemes de Oliveira

Prof. Emanuela Torrigiani

DASTU, Politecnico di Milano

Tutors

Israa Mahmoud, PhD

Sanaz Ghaffari Zaki, MSc

Selena Vinetti, MSc
