Small artifacts for rural regeneration of alpine territories at high altitude

July 12th-23rd, 2021 // MS Teams: <https://tinyurl.com/>

Designing shelters for transhumant shepherds on natural alpine grassland

The workshop aims to plan a proposal for the "reconquest" of the most inaccessible mountain areas by rethinking architectural prototypes to support the forage and livestock system in the highlands.

The object is to design transportable micro-modules through multidisciplinary interaction and dialogue with professionals with several disciplinary backgrounds, institutions and farmers from different territories in the Alpine region.
