

Cities in action for the New European Bauhaus

Leveraging on culture and arts

The seminar series invites researchers, professionals, artists, activists and social innovators from across Europe to explore the key concepts that, in the New European Bauhaus framework, provide a direction to the urban sustainability transition trajectories.

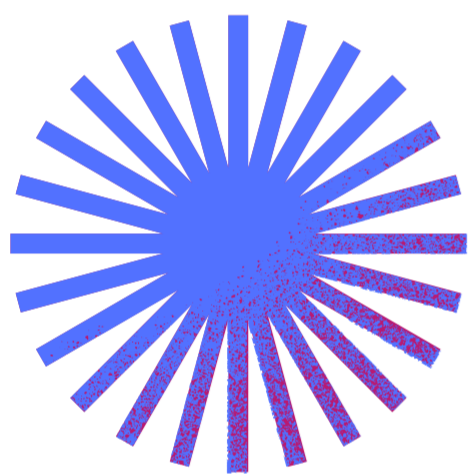

What is a city's aesthetics and how does it affect the urban experience? How can the sustainability imperative be translated into actions on the ground? What makes a neighbourhood inclusive and accessible for all? And more: What is the role and meaning of cultural practices in the journey of cities towards high-quality, climate-neutral and socially inclusive futures?

Given the urgency to create novel alliances and conceptual blueprints across both mission-oriented research and advanced practices on the ground, the seminar series encourages discussion across professional and disciplinary perspectives.
