## **DELIBERATION TECHNOLOGIES: STATE OF THE ART, CURRENT LIMITATIONS, AND FUTURE RESEARCH TO ENABLE PARTICIPATORY POLICY AND DECISION MAKING**

**Annalisa De Liddo**  
KMI The Open University

In this talk, Professor Anna De Liddo will outline a range of Deliberation Technologies that can effectively help large distributed groups of people and communities participate in healthy dialogue and improve the way they collaboratively address complex social challenges. Deliberation technologies are critical in addressing the growing need to establish a new dialogue between citizens and policy makers. On the one hand, they can foster a better understanding of citizen perspectives and anticipate their reactions to policy decisions. On the other, they can provide new spaces for citizen engagement in the discussion and deliberation of public issues, created and designed specifically to support an inclusive, transparent, reflective and democratic process through which large groups can collectively negotiate and shape their futures.

**Discussants: Irene Bianchi and Anna Moro (Politecnico di Milano)**

Transnational  
Architecture and  
Urbanism

**Cities in Action  
for Learning Lab**

School of Architecture, Urban Planning and Construction Engineering  
UPPD MSc Course: Smart Cities and Urban Innovation

All seminars will take place at Politecnico di Milano, Leonardo Campus in Milan and on Webex: <https://politecnicomilano.webex.com/meet/davide.ponzini>

Organized by: Davide Ponzini, Grazia Concilio, Zachary Jones, Abdallah Jreij, Maryam Karimi
