

# NOT ORDINARY HOUSING IN MILAN

Housing conditions beyond the norm are spreading in large metropolitan regions of the Global North. The rise of **homelessness**, the expansion of manifold conditions of **social vulnerability**, the persistence of **global migratory fluxes** related to economic reasons as well as to **wars and crisis**, changes in the labour market with the growth of a highly mobile, **precarious workforce**. These are some of the many factors that are pushing more and more people to live in **conditions that are “out of the ordinary”**, in a context that is characterized by skyrocketing housing prices.

Students have explored this large topic by designing grounded research projects that have led to the production of nine short documentaries.
