

Social impact assessment using ecosystem services, present and futures scenarios

Cases of Milano and Utrecht

The research presents progress and preliminary results on social impact assessment procedures in the cities of Milano and Utrecht through a co-evaluation process using ecosystem services focusing on the benefits and impacts of nature and urban biodiversity on human lives. Ultimately, the research explores the future of social-ecological scenarios in the local Milano case study.

28.03.2025

11:00 - 13:00 CET

Hybrid session
Politecnico di Milano
Campus Leonardo
Building 29, 1st floor
Sala Consiglio

Presentation:

Asef Ayatollahi

DASStU, Politecnico di Milano

Discussants:

Niki Frantzeskaki

Utrecht University

Giuseppe Carrus

Università degli Studi Roma Tre

Supervisor:

Eugenio Morello
