THE AL-URUBAH PARK PROJECT IN RIYADH

Jens Hoffmann (COO of LAND)
Stefano Roman (Director of LAND Italy)
Fabio Lassini (Head of Engineering Division,
Montana)

The Al Urubah Park is part of the broader Green Riyadh Program. It represents a large park in a growing metropolis of the Middle East. The integration of the natural, infrastructural and digital layers constitutes an interesting experiment. The designers and engineers behind this project will present the project and discuss it.

Discussants:

Abdallah Jreij (PhD Candidate, Politecnico di Milano)

Matteo Poli (Associate Professor of Landscape Architecture, Politecnico di Milano)

DEPARTMENT
OF ARCHITECTURE
AND URBAN STUDIES
