**University of Malta**

# Sustainable by Design – Reflections and Projections

Professor Vincent Buhagiar, an architect & civil engineer, holds a PhD in energy efficiency in buildings. Through his specialisation, stemming from an MSc in Architectural Science, he was instrumental in setting up the Department of Environmental Design at the Faculty for the Built Environment, of which he was Head of Department for eight years. He devised an MSc in Environmental Design for architects and building engineers. At the undergraduate level, he lectures in Architectural Science, Bioclimatic Architecture, Design, and Energy Retrofitting in the Built Environment. He is a nominated EU expert assessor on energy and building performance-related thematic projects and COST Action proposals. He is currently supervising three PhDs, which relate to high-tech glazed facades, building performance, occupant comfort, well-being and lifestyle changes towards sustainability. He has published extensively in these fields.
