Responding to climate change on Italian coasts

Aula B.2.1, via Bonardi 9
Ed. 14, 2° piano
Politecnico di Milano
Metro Piola

3

Climate change is already occurring, and coastal areas are disproportionately impacted due to a complex interplay of environmental, socio-economic, and infrastructural factors.

The seminar will present Italian coastal planning issues and review current adaptation strategies, focusing on the retreat paradigm as an antifragile instrument to treat urbanized coastlines.

Speakers

Giulia Motta Zanin, Politecnico di Bari
Coastal erosion in the Mediterranean: drivers, consequences and challenges

Giacomo Ricchiuto, DASTU
Approaches and planning strategies for coastal futures

Moderator

Andrea Rigon – DASTU
